It's important that donations are made to a variety of these campaigns because while all are in the general area of the campsite and do communicate, the different campaigns don't always or can't always share different resources. Grab a group of friends, make strips of paper, and shuffle to make donations.

It has come to my attention that this regained popularity in recent weeks. As the author, I'm deeply humbled by the support in the form of reblogs and likes even despite the crass language. I'm not Lakota or from the areas of these tribes. I'm from a Pueblo in New Mexico (shout-out to the Pueblo camp at standing Rock!) And Navajo Nation. I made this post at s tumultuous time in my life when I had accrued so much capital and privilege in the white man's world. Back when these were working links, I was a community organizer that went into a post traumatic stress disorder episode while this post was getting popular 2 years ago when Standing Rock was still at camp. I ask folks to reblog this out of respect to the many people and messages passed that allows for campaigns like these to exist. I'll never know how much was raised but know that y'all were a part of something huge and important. That two years is not a long time and progress is like watching grass grow.

Kurd's comment on the interview:
"I knew this interview was going to have a biased, inaccurate framing, and it did from the start. But I made sure I course corrected. I'm happy that you cannot edit a live interview, because there's no way I could have spoken so bluntly about the myth of "both sides" and Israeli "self-defense" had this been prerecorded. Thanks CNN for taking my testimony about settler-colonialism."

They're using a 'fuckracism' hashtag, but don't let that shit fool you. It's ethno-tribalist white-supremacist bullshit cloaked in vaguely anarchist terminology. They're also trying to infiltrate green and pagan spaces. Avoid like the plague.
You may not have heard of it and it may sound contradictory (because it is), but is a charade that's actually been around since the 90s when Troy Southgate gave it wings. When I first got into anarchism over a decade ago, there were NAM assholes in my region, and I had to watch out and not fall for their racist shit. These instagram clowns seem to be mostly based in Italy, but always be vigilant.

daggers-drawn Follow

Namis are fucking scum and not anarchists. Their name is even an allusion to the "National Socialist Movement" (NSM) which is one of the largest explicitly neo-nazi organizations in America.

When the Namis tried to organize a May Day anti-immigration march in the Bay Area, actual anarchists showed up and kicked their asses accross the fucking pavement. That chapter fucking collapsed immediately after.

That's how you handle them. Don't talk, just rock.

It's time to kill the idea that we can only grow and heal when we're uncomfortable. You heal every time you have a good conversation with someone. You heal every time you laugh. You heal every time something makes you smile genuinely. You heal every time you have fun creating something - anything. You heal every time you get so absorbed in something fun that you forget your struggles for a while. There is, in fact, lots of healing and growth to be found INSIDE your comfort zone.

Just thinking about how even after having usurped his authority, Loki gives Heimdall the opportunity to walk away peacefully by merely exiling him, Heimdall rejects it in the most dramatic way possible by trying to take off Loki's head, and Loki *still* allows him to go on living.

Thinking about how Sif and the Warriors 3 talk down to Loki even as he's standing over them as king; go on to betray him in so dramatic a fashion that he winds up attempting suicide and falling into the hands of a genocidal cult; repeatedly threaten to kill him with no provocation while he's in freaking handcuffs, and he *still* saves them from facing any serious consequences for their treason.

Thinking about how Thor has spent centuries belittling and intimidating Loki and has made it very clear that he has no love left for him and doesn't even consider him his brother anymore; has never once tried to understand Loki's POV or how things got so messed up between them; tells him repeatedly that he doesn't trust him and twice uses Frigga's memory to manipulate or cause him pain, and Loki *still* risks both his life and his potential freedom to save not only Thor himself but also the mortal girlfriend he's just finished telling Thor isn't worth getting attached to.

Thinking about how Odin stripped Loki of his identity and his culture for personal/political gain; lied to him about it his entire life; raised him to despise his own race; withheld his approval at every turn, even as Loki was dangling over an abyss with tears streaming down his face; literally told him to be grateful he hadn't slaughtered him as an infant, before hypocritically sentencing him to eternity in the dungeons and making a point to rub it in his face that he'll never see the one person he ever felt loved by again; sent an impersonal guard to inform him that she was gone forever; I'M SURE THERE ARE SEVERAL OTHER OFFENSIVES I'M MISSING HERE, BUT THERE ARE SO MANY MY BRAIN CAN'T EVEN KEEP TRACK OF THEM ALL. And still, the worst Loki does is wipe his memories and leave him in a retirement home on Earth with every expectation that he'll be well cared for until the end of his days.

sigh Just thinking about Loki.

#this raises some interesting points#I would argue that thor does care about loki just because I think that is the intent and also the more interesting character read#so I usually don't count some of his extremely callous moments towards loki as canon (like the electrocutions scene) because they make him#less interesting to me and contradict other things previously established. but if u read things purely based on canon this works.#another rmoment I find very ooc is in TDW. thor literally just said in avengers 'who controls the would be king' so he knows loki is being#controlled. he takes him prisoner so shield won't get him and torture him. but then in TDW this plot thread gets dropped#but yeah this is interesting meta#that has great analysis and raises good points#as usual#meta#MCU#Marvel#Loki (via @iamnmbr3)

Here's the problem: this analysis is about actions, not intent. And you don't need to turn to more severe, overt moments of cruelty to see Thor's actions towards Loki as harmful. His behaviour (and that of his friends, which he appears to condone) is filled with microaggressions, which can be just as damaging. Like Frigga, Thor may care about Loki… to an extent and when it suits him. But he has little regard for Loki as an individual. Both characters love the idea of Loki far more than they love Loki himself. Or, as @alstee once put it: Thor loves Loki, but it's a child's understanding of love.

I'd personally argue that it's not *The Dark World* that drops Thor's "who controls the would-be king?" inquiry. It's *Avengers*. He asks this one time, and one time only, and he never once brings it up amongst his new friends. He tells them "Loki's mind is far afield", but he frames it in terms of Loki being mad with jealousy and desiring vengeance upon him personally. He never suggests to them that Loki may be working with/for someone else or that he may not be doing this entirely of his own volition. Sure, I suppose you can criticize TDW for not bringing up the topic again once the dust has settled, but it's certainly not solely to blame. Thor just appears to have the attention span of a gnat.

I also reject the reading that Thor captures Loki in order to protect him from SHIELD. He captures him because that's what he's been instructed to do, so that Odin can render judgment. There's nothing in the movies to indicate that he did so out of a sense of mercy or loyalty.

I will grant that Thor truly caring for Loki is perhaps the more interesting reading (interesting is in the eye of the beholder, of course); and I'll further grant that him caring for Loki is probably what the writers intended. Unfortunately, it's just not what they ultimately showed me onscreen. They showed me someone who didn't understand Loki and couldn't be bothered to try. And if I were to judge Thor's behaviour based on the writers' intent rather than his canon actions (*all* his canon actions, not just in TR), I would have to extend the same courtesy to Odin and Frigga and every other character. At a certain point, that actually becomes *less* interesting, IMO.

international people start calling our country aotearoa instead of new zealand challenge

catboydindjarin

aotearoa is the te reo name for our country, commonly translated as "land of the long white cloud" as the story goes Kupe was guided to our whenua by following a long white cloud in the sky. new zealand is a name which was forced on us by colonizers who stole our precious land less than 200 years ago. by reverting back to the māori name you are metaphorically giving the land back to the tangata whenua, the people of the land, and we can begin to normalize using the proper names for things that should have always belonged to māori

> In fact humans, once you get to meet them without a pitchfork in their hands, are remarkably focused and flexible creatures. It is amazing what they will tolerate provided it is not done to them personally. You will be pleasantly surprised. These are city people. Out in the rural areas, somebody sees everything. In the city, however, provided you do not make too much noise or are excessively cruel to animals, and nod cheerfully to your neighbors should you encounter them, then no one will bother you until blood actually seeps through the partition wall. And even then, they may well preface their opening remarks with 'Excuse me...' In short, humans in the city prevent themselves from going totally insane by ignoring all but a tiny amount of what is happening around them. provided that you follow our sensible advice and try to fit in, they simply will not notice you.
